FARIA NAWER

Senior QA Automation Engineer · UI, API & End-to-End Test Automation

Chattogram, Bangladesh | +88 01744881007 | nawer.faria@gmail.com | linkedin.com/in/faria-nawer-7344299a | github.com/nawer-faria

PROFESSIONAL SUMMARY

Senior QA Automation Engineer with **4.5+ years in software QA and test automation** (5+ years in engineering roles) across enterprise fintech, banking-integration and HR platforms. Built a **Playwright + pytest framework from scratch** with multi-environment execution and Allure reporting, and maintain Java automation with **Selenium WebDriver, TestNG, Gradle and REST Assured**. Delivered zero critical-defect production launches for banking integrations with SCB and HSBC, and cut manual testing effort by 60%+. I own automation end to end: environment setup, framework design, stabilizing unreliable tests, reporting, and the release quality gate.

CORE SKILLS

Automation Frameworks: Playwright • Selenium WebDriver • TestNG • pytest • REST Assured • Appium • Allure Reporting

Languages & Data: Java • Python • SQL (PostgreSQL, MySQL) • MongoDB • Elasticsearch

Testing Scope: UI, API, Integration & End-to-End • Regression Strategy • Risk-Based Testing • Mobile (Android / iOS) • Performance & Load (JMeter) • UAT Coordination

Build & Environments: Git • GitLab • Gradle • Linux (Ubuntu) • Multi-environment test configuration (dev / staging / test) • CI/CD fundamentals

API & Integration: Postman • Swagger UI • OAuth2 / Keycloak

Messaging & Monitoring: Apache Kafka • RabbitMQ • ActiveMQ • ELK Stack

Process & Tooling: Agile / Scrum • JIRA • Zephyr • Confluence • Defect Lifecycle Management • Release Quality Gates

PROFESSIONAL EXPERIENCE

Senior SQA Engineer — **Jan 2025 – Present**
BRAC IT Services — *Dhaka, Bangladesh · Hybrid*

- **Framework from scratch:** designed and built a Python + Playwright + pytest automation framework for the ePMS (performance management) module, covering the full Objective Setting, Mid-Year and Year-End Review cycle end to end with Allure reporting; versioned in GitLab.
- **Environment setup & stability:** configured the suite to run against dev, staging and a dedicated test environment, resolved environment-specific failures and added dynamic handling of variable form data, bringing the full suite to a consistently passing state.
- **Java framework modernization:** migrated the Java UI automation project from FluentLenium to Selenium WebDriver + TestNG with Gradle builds, and moved the automation toolchain from Windows to Ubuntu.
- **Reduced manual testing dependency by 60%+** with one-click automation for API and regression flows on the SmartMF microfinance platform, shortening release cycles.
- **API automation:** built API test suites with REST Assured and Postman, including a reusable REST Assured base class handling OAuth2 client-credentials and password grants against a Keycloak identity provider.
- **Zero critical-defect launches** for enterprise banking integrations with SCB and HSBC by architecting functional, integration and regression test plans across complex financial-transaction workflows.
- Owned the quality lifecycle for the SmartMF backend from test planning and defect governance to release approval, and coordinated test execution across Android and iOS releases with Engineering, DevOps and Business teams.

SQA Engineer — **Jun 2022 – Dec 2024**
BRAC IT Services — *Dhaka, Bangladesh*

- Executed functional, integration and regression cycles for Microfinance and HRMS modules, improving release readiness and module stability.
- **Started API test automation:** automated the OTC APIs of the SmartMF microfinance platform, reducing repetitive manual API testing across releases.
- Mapped business requirements to detailed test-case design, closing coverage gaps and improving traceability across releases.
- Reported defects with reproducible evidence and severity analysis in JIRA and Zephyr; supported release validation and post-deployment verification.

SQA Engineer Intern — **Feb 2022 – May 2022**
BRAC IT Services — *Dhaka, Bangladesh*

- Supported module testing, defect documentation, test reporting and requirement-analysis sessions on enterprise releases.

Research & Development Engineer **Nov 2020 – Dec 2021**
Artificial Intelligence Bangladesh *Dhaka, Bangladesh*

- Tested and validated R&D prototypes and delivered technical workshops on applied AI and software topics.

EDUCATION

M.Sc. in Information & Communication Technology **2024**
Bangladesh University of Professionals (BUP) *CGPA 3.79 / 4.00*

B.Sc. in Electrical & Electronic Engineering **2016**
Rajshahi University of Engineering & Technology (RUET) *CGPA 3.32 / 4.00*

CERTIFICATIONS & TRAINING

- **Software Manual & Automation Testing** — SQA Learning Academy (Selenium, Appium, REST Assured, framework design)
- **DevOps 101: Hands-on Introduction** — BRAC IT (CI/CD pipelines, Git, deployment workflows)
- **JMeter: Performance & Load Testing** and **Learning SQL Programming** — LinkedIn Learning

PUBLICATION & LANGUAGES

- **IEEE ICICT4SD 2023:** Indoor Environment Quality of Industrial Workplace in Bangladesh (peer-reviewed).
- **Languages:** Bangla (native), English (fluent, professional working proficiency).
